

Stanford | Code in Place

Human-Centered Learning for All

A global community of thousands of students and teachers learning introductory programming together.

COHORT 2026 BEGINS: APRIL 20TH

WHO CAN JOIN

As a Student

For everyone from humanists and social scientists to engineers. If you have no programming experience, this is for you.

- Requires 7+ hours per week
- Commitment to 6 weeks of learning
- Willingness to join live weekly sections

As a Section Leader

For programmers in industry, university students, or retired teachers who want to give back to the community.

- Requires 2+ hours per week
- Must know Python basics (CS106A level)
- Passion for mentoring small groups

WHY TO JOIN

CV & Professional Growth: Gain high-impact experience as a Stanford Teaching Fellow or a certified learner.

Leadership Skills: Section leaders develop team leading and education skills essential for industry roles.

Vibrant Community: Network with a supportive, global group of 60,000+ like-minded individuals.

Portfolio Building: Build neat projects from scratch and host your portfolio on Stanford's servers.

HOW TO JOIN

The application process is entirely online and free for everyone.

Online Application: Submit your details and motivation on the official platform.

Coding Challenge: Complete the introductory logic puzzles to show your interest.

Teaching Demo (SLs): Record a short video teaching a basic concept.

Official Portals

Learners: codeinplace.stanford.edu

Teachers: teach.codeinplace.org

Applications are reviewed globally. Good luck!

Stanford | Code in Place

Section Leader Roadmap

Your step-by-step guide to becoming a volunteer teacher in the world's largest classroom.

Application Deadline: Tuesday, April 7, 2026

WHY JOIN AS A SECTION LEADER?

Boost Your Profile

Add a prestigious Stanford University volunteer teaching role to your CV/LinkedIn. Stand out to top-tier employers.

Global Networking

Teach international students from over 120 countries. Build connections that span the globe.

Master Pedagogy

Learn professional teaching ethics and methodologies. Master the art of explaining complex concepts clearly.

"Teaching is the best way to learn both content and team-leading skills."

APPLICATION ROADMAP

Pro Tip: The Teaching Demo is the most critical part of your evaluation!

THE TEACHING DEMO

This is your chance to shine. You will record a short video explaining a Python concept.

- ★ Focus on clarity and simplicity.
- 😊 Show enthusiasm and energy.
- 🎤 Ensure good audio quality.
- 💡 Use the "iCodeGuru" teaching style—it works!

Call for Demo 8527926648

SOLVE THE PROBLEMS

Challenge Set

You must solve three main tasks to prove your Python proficiency:

-  **Fill Karel:** Basic logic and control flow.
-  **Double It:** Working with variables and math.
-  **Debugging:** Find and fix errors in existing code.

Note: Problems are hosted on the Stanford CiP portal.

CONFIDENCE OVER IMPOSTER SYNDROME

Why You Are Ready

If you've taught on **iCodeGuru**, you are already using the same teaching format. You are familiar with tools like Zoom and live coding practice.

Stanford Training

Once accepted, Stanford provides comprehensive training on the "Art of CS Education." You are never alone in this journey.

| 24/7 SUPPORT NETWORK

 **24/7 Forum:** Ask questions anytime in the dedicated teacher community.

 **Teacher Managers:** Dedicated staff to support your section leading.

 **Weekly Meetings:** Synchronous check-ins with SL Heads.

 **Mentorship:** Support before and after you are selected.

| THE ROLE & COMMITMENT

2

HOURS PER WEEK

One 50-minute section + prep time.

10

STUDENTS PER SECTION

A small, manageable, and impactful group size.

| IMPORTANT DATES

Application Closes In: 1 Month

April 7, 2026

11:59 PM ANYWHERE ON EARTH

Status: Incomplete - Start Your Demo Today!

CHECKLIST FOR SELECTION

- ✓ Read the "Learn about the job" section carefully.
- ✓ Draft a compelling "Tell us about yourself" bio.
- ✓ Finalize and record your teaching demo (Priority #1).
- ✓ Debug and double-check your Karel/Python solutions.
- ✓ Attend weekly meetings for support and updates.

“

"Teaching is joyful, and teaching is the best way to learn content and leading skills."

— Stanford Code in Place Team

Ready to Apply?

Don't let imposter syndrome stop you. You have the skills!

Final Deadline: April 7th, 2026

Need help with your demo? Contact the SL Head or check the forum.

COURSE CONTENT: CS106A FUNDAMENTALS

Code in Place is a free, intro-coding course adapted from Stanford University's flagship course, **CS106A**. Over 6 weeks, students learn the fundamentals of computer programming using **Python**.

- **Stanford Curriculum:** 30 years of pedagogical development.
- **Programming Logic:** Control flow, loops, and conditionals.
- **Data Handling:** Variables, lists, and dictionaries.
- **Graphics:** Creating interactive visual art.

Syllabus

In Code in Place you will learn the fundamentals of Python programming including: control flow, loops and conditionals, console programs with variables, graphics, lists and dictionaries.

Week #	Topic	You Build	Unit
Week 1	Control Flow with Karel	Welcome Karel	Karel
Week 2	The Art of Coding	Puzzle Karel	Karel
Week 3	Console Programs	Sandcastles	Console
Week 4	Understanding Variables	Khansole Academy	Console
Week 5	Graphics	Random Art	Graphics
Week 6	Lists + Dictionaries	World's Hardest Game	Graphics
Beyond Code in Place	Continue Learning	Final Project	Creativity

Past Offerings

We have hosted Code in Place five times, in 2020, 2021, 2023, 2024, and 2025. It was an inspiring experience. Tens of thousands students have been introduced to the wonderful world of programming in Python. Many new teachers had their first experience in front of students. Friendships were made across countries.

It was perhaps the single course with the largest number of teachers ever. Across four offerings we had over:

5,500 section leaders teach

60,000 students

1:10 student to section leader ratio

Learn CS106A Material

Students and section leaders came from around the world, and represented a broad distribution of backgrounds. Everyone is welcome is one of our mottos.

WHO CAN JOIN? ELIGIBILITY & PREREQUISITES

Role	Target Audience	Prerequisites	Commitment
Learners	Absolute beginners, humanists, engineers	No prior coding experience needed	7+ hours/week for 6 weeks
Section Leaders	Pros, retired teachers, uni students	Know first half of CS106A (up to Dicts)	2+ hours/week for 6 weeks

"Everyone is welcome represents our core distribution of backgrounds."

WHY JOIN CODE IN PLACE?

Exciting Assignments

The ultimate joy of programming is to build things that you are proud of. Build neat projects, from scratch and get creative. [Publish](#) your work and share.

A Big Community

Join with folks who are trying to learn to program, at the same time as you. Ask questions to our section leaders. Help each other grow.

Stanford Lecture Videos

Learn the skills and techniques necessary to become an amazing coder from our Stanford professors Mehran Sahami and Chris Piech.

Section Every Week

Meet weekly with 10 students for a more personalized learning experience. Sections are lead by our team of section leaders from around the world.

Human-Centered Community

Unlike massive open online courses (MOOCs), Code in Place focuses on the **human element**. We recruit and train one volunteer teacher for every 10 students.

Teaching is the best way to learn.

Join a vibrant global community that believes teaching computer science is as joyful as learning it.

MAIN COURSE COMPONENTS

Stanford Lectures

Learn skills from Stanford professors Mehran Sahami and Chris Piech through engaging video modules.

Weekly Sections

Meet weekly with 10 students and a dedicated section leader for a personalized learning experience.

Exciting Projects

Build things you are proud of, from scratch, including console programs and interactive graphics.

THE 6-WEEK ROADMAP (SYLLABUS)

Week	Topic	Unit	Project Highlight
1	Control Flow with Karel	Karel	Welcome Karel
2	The Art of Coding	Karel	Puzzle Karel
3	Console Programs	Console	Sandcastles
4	Understanding Variables	Console	Khansole Academy
5	Graphics	Graphics	Random Art
6	Lists + Dictionaries	Graphics	World's Hardest Game

PROVEN GLOBAL IMPACT

Spanning **120+ Countries** across five successful offerings (2020-2025).

STUDENT SUCCESS & FEEDBACK

*"It was a chance to learn something new...
the community was vibrant and supportive."*

Average Recommender Strength: 9.7 / 10

JOIN THE FELLOWSHIP

Folks from all contexts can be exceptional educators. Apply as a **Section Leader** for 2026.

- **Teaching Demo:** Record a short video explaining a simple CS concept.
- ▢ **Prerequisite:** Know the first half of CS106A (Python basics).
- 🕒 **Availability:** Commit 2 hours per week for 6 weeks.

Pro Tip: We provide training on the art of computer science education once you are accepted!

FREQUENTLY ASKED QUESTIONS

- ? **Is it truly free?** Yes, completely free for everyone globally.
 - ? **Is there a certificate?** Yes, a portfolio of your code hosted by Stanford.
 - ? **What are the dates?** Course starts April 20, 2026.
 - ? **What is a MOOC?** This is *not* a traditional MOOC; it's community-driven.
 - ? **Language?** The course is taught in Python.
 - ? **Time zones?** Section times are flexible to suit you.
